

APPRECIATION OF MANUAL TECHNIQUES

Interested in engineering or eager to learn new skills? This hands-on workshop introduces you to key manual engineering techniques. Work with different materials and create your own take-home product while gaining real-world skills in turning and fitting techniques.

DATE

11 June 2025

TIME

10.00 - 14.00

LOCATION

Crawley College

COST

£40

COURSE CONTENT

1 Introduction to turning techniques:

Use a lathe to shape metal with precision cutting, drilling, and finishing.

2 Fitting techniques:

Learn to assemble and adjust mechanical parts for a perfect fit.

3 Practical project:

Apply your skills in a guided project to create a finished product.

WHO CAN JOIN?

Anyone 16+ with an interest in mechanical engineering.

NEXT STEPS

Receive a college certificate upon completion and explore digital skills qualifications.

Please note: All courses are subject to demand and tutor availability. Course fees and details are accurate for the current academic year.
